SUMMARY

Software Engineering student at UNEB with hands-on experience across the stack: high-performance Rust components, Tauri desktop applications, Spring Boot and Go backends, and data work in Python and R. I treat side projects as products — documented, benchmarked and shipped — and my final thesis researches generational references for memory safety in compilers.

EXPERIENCE

Administrative Assistant

2020 — 2022

Atacadão Pinto

Product and supplier registration, pricing and management of merchandise budgets. Where I learned to be precise with data.

Thesis — Generational references

2026 — Now

Compiler engineering research

Experimental evaluation of generational references as an automatic fallback to strict rejection in ownership-based languages, measured on the Arandu compiler.

Open source & product work

2026

Hycore · Nanquink · Apito · Moussee.me

A year of shipping: a lightweight game launcher with 10 stars, a local-first writing app, a Rust simulation engine and a Cloudflare-first platform.

SELECTED PROJECTS

Imglyze

Rust · Tauri 2 · React · TypeScript

Your images, lighter. — A local desktop app to optimize, convert and resize images in batch — with before/after comparison and

EDUCATION

Software Engineering

State University of Bahia (UNEB) · Campus II

2023 — Now

SKILLS

LANGUAGES

Rust · TypeScript · JavaScript · Kotlin · Java · Python · C · C# · Dart · R · SQL

FRONTEND & UI

React · Svelte · Astro · Tailwind · Flutter · Compose · HTML5 · CSS3

BACKEND & DATA

Spring Boot · Node.js · Express · PostgreSQL · Prisma · SQLite · Hibernate · gRPC · .NET

DESKTOP & SYSTEMS

Tauri · Unity · JavaFX · FXGL · Docker · Linux · Nix

TOOLS & INFRA

Git · GitHub · Cloudflare · Vite · Gradle · Neovim

COMPLEMENTARY COURSES

Administrative Assistant

2018

Concretta Escola da Construção

processing that never leaves your machine.

Hycore

Rust · Tauri · React · Tailwind CSS

The launcher Hytale deserves. — An open-source, ultralight game launcher built on Tauri instead of Electron — native Rust performance, mod management, isolated profiles and sub-10 MB builds.

Apito

Rust · gRPC · Protobuf · Unity

A football simulation engine, in Rust. — A Football-Manager-style simulation engine in Rust that powers the Unity game "Manager's Legacy". Five acyclic layers, a gRPC/Protobuf protocol and 23 specified modules.

Nanquink

Rust · Tauri 2 · React 19 · TypeScript

Write books, together. Offline first. — A book-writing app with local-first collaboration. It blends Scrivener's spatial organization, Google Docs' transparent sync and background intelligence — all offline and open (GPL-2.0).

QuiJava

Kotlin · Compose Desktop · Spring Boot · Hibernate

A desktop quiz platform. — An interactive platform to create and play quizzes, with authentication, ranking and history — a Material Design 3 desktop client over a Spring Boot backend.

Moussee.me

SvelteKit · TypeScript · Cloudflare Workers · D1

Identity and links for creators, at near-zero cost. — A high-performance link-in-bio platform with a Cloudflare-first architecture and full domain decoupling — a monorepo spanning a SvelteKit studio and an edge gateway.
